

MARIJANA SEVO

Software Engineer

SUMMARY

I have a strong interest in full-stack development, with a particular focus on frontend technologies. I am truly inspired by the process of taking an idea and bringing it to life through code. It is highly satisfying to solve a problem and create something that has real-world use.

WORK EXPERIENCE

Software Engineer, Freelance

Jan 2022 — Present

- Worked independently as well as collaborated with marketing and design teams to create visually appealing UI/UX designs that aligned with clients' branding guidelines.
- Implemented responsive design principles across multiple projects, ensuring optimal user experiences on all devices
- Proactively identified and evaluated emerging technologies and tools relevant to the project requirements and learned them as necessary to ensure the successful completion of the project.

Recent Projects:

Zdrava Doza – This website is a comprehensive health resource dedicated to providing information on common health concerns. It covers topics related to physical and mental health as well as lifestyle factors that impact overall well-being.

Silken Skin Co – Silken Skin Co Store is an ecommerce website that specializes in selling skincare products. The main goal of the website is to provide a convenient and easy-to-use platform for customers to buy their favorite skincare products from the comfort of their own home.

Implementation Specialist and SW Support at NCR Corporation | BL, BiH

Feb 2020 — Jul 2021

- Successfully implemented new software products on clients' hardware systems
- Collaborated closely with clients to ensure successful software implementation and conducted comprehensive training sessions for clients
- Conducted rigorous QA testing on newly implemented software, and identified and resolved all defects prior to product launch etc.

Junior Frontend Dev at asioso | Banja Luka, BiH

Jan 2017 — Nov 2018

- Collaborated with experienced programmers in an agile environment using tools such as Jira.
- Employed Git to manage version control and collaborate effectively with team members.
- Utilized HTML, CSS, and JS to ensure responsive and visually appealing designs.
- Maintained consistent communication with team members.
